

The Benedict Option

This is the well-read book which inspired this website. It was very encouraging to hear from someone like Mr. Dreher who clearly sees the problem for what it is and can also envision the way to overcome it through our faith. So many others seem blind to it, or hopeless regarding a solution. I can say amen to 90-percent or more of this work. I also hope Mr. Dreher continues with this important theme in the future.
